When reduced with water and sweetened it is pleasant to take.  
Every man of a family should keep this remedy in his home. Buy it now. Price, 25c. Large Size, 50c.

BISBEE DRUG CO., BISBEE, NACO AND LOWELL.

## RAILROAD MAN TALKS ON EL PASO

General Freight Agent Brown Discusses Wonderful Growth of El Paso and Surrounding Communities.

A. N. Brown, general freight agent of the El Paso & Southwestern Railroad Company, arrived in the city yesterday morning from his headquarters in the Pass City, and after spending the day attending to matters of importance to his road, left the city last evening for his home.

When seen by a Review reporter and asked concerning his trip, Mr. Brown stated that it had no special significance, but that he was simply going over the line attending to matters which are of a routine character. When asked concerning conditions at the Pass City, Mr. Brown said:

"As almost everyone knows, El Paso has during the past twelve months taken the biggest strides which have been made since the city was founded. Owing to a combination of circumstances of commercial importance, it has gone forward until at the present time it is recognized throughout the country as the natural gateway into Mexico.

"In the city at the present time the greatest prosperity is apparent to the most casual observer. On every hand building operations are in progress and about the business houses there is the atmosphere of activity which is always present in a thriving community.

"When the railroad shops were brought to El Paso some months ago there was a healthy influx of mechanics and craftsmen with their families, and since that time every energy has been exerted to construct homes for them. At the present time the problem has about been solved. Various new office buildings have also been erected, probably the most important of which is the new structure in which the El Paso & Southwestern offices will be located. This immense building is now nearing completion, and it is the expectation that it will be ready for occupancy before fall.

"However, the great prosperity is not confined to El Paso itself, as the agricultural interests in that vicinity are now enjoying their greatest period of progress. Since it was assured that the Federal Government would undertake the construction of the Elephant Butte Dam, farm lands have increased in value to a great extent. The assurance of the completion of this great project means the future of the agricultural districts along the Rio Grande river at that point, and the future of El Paso as the logical center and shipping point for this vast territory.

"Taking all of these circumstances into consideration, it is not wonderful that the Pass City has had such a great growth, but over and above all these incidents the universal purpose of the business men of the city to see it the greatest in the southwest has been the propelling force towards a greater El Paso."

## PICKETS HAD NO CASE AGAINST JOHNSON

After Listening to Testimony of Shields and Cooper Justice Grier Dismisses Case Against Lowell Officer.

Lowell yesterday afternoon presented rather an animated appearance during the trial of John M. Johnson, arrested on complaint of two union pickets, Lou Shields and G. W. Cooper. The trial was originally set for 2 p. m., but owing to the fact that Judge R. S. Grier was busy in Judge Hogan's court at Bisbee as a witness in a garnishment proceeding, it was near 5 p. m. before the trial began.

After the complaint had been read the defendant's attorneys discovered that the prosecution was represented by two additional attorneys not connected with the District Attorney's office, L. Kearney and W. B. Cleary. After a lengthy objection by Attorney George Neale, for Johnson, it was finally decided to call up the District Attorney at Tombstone and get his authority for Kearney and Cleary to assist in the prosecution. After a wait of fifteen minutes, the District Attorney gave his consent to both Kearney and Cleary appearing with Attorney Strickler. These preliminaries over, the witnesses were called and sworn, when the prosecution discovered they were short three of their witnesses, whereas the judge facetiously remarked that they were probably down getting a bowl of soup. They were shortly rounded up and brought into court and sworn.

Lou Shields was the first witness. He stated that he had been a resident of Lowell for one year; that he was a member of the Western Federation of Miners, and that he had worked here under three different names. In reply to a question as to what occurred on the morning of the 20th, he stated that he, in company with one G. W. Cooper, went to meet the train at Lowell siding and ride to Bisbee, as had been the custom for some time. That he was approached by John M. Johnson, who asked him his business, to which he replied he did not know. At this Shields stated Johnson remarked that he would not stand for any more names and trying to intimidate men and prevent them from going to work, and that he would not have their kind of people hanging around there; that if he wanted to be a man to get a job and go to work. After a wordy argument, in which it is alleged Johnson placed his hand on his pistol pocket, Shields struck out for Lowell in quest of an officer, but according to his story was not able to find one, and came back, escorted by five Slavonians, who had been advised of the trouble, and almost every article shipped which takes the fifth class rate. On this class of goods the Board of Trade has assured a reduction of at least 20 per cent from California points and 15 per cent from eastern points will be made.

Mr. Buxton stated that the reductions conceded by the railroad company would mean a saving to the consumers in the district and in addition would enable the jobbing merchants to increase their trade with outlying towns, by cutting the saving to consumers in the cost of the necessities of life, on account of the reduced freight rates to Bisbee, would be not less than \$200,000 per annum.

In addition to the reduction in the fifth class rate, a reduction was made on furniture from the east in carload lots of 15 per cent.

The Board of Trade of Bisbee was organized about two years ago and has forty-four members. George Buxton is president; C. M. McKean, vice-president and Charles A. Hall, secretary.

The action of the railroad companies in granting to Bisbee and Douglas reduced freight rates means that merchants in these cities will have an unusual opportunity with outside jobbing firms, reaching out for the retail trade surrounding, and at the same time will enable retailers to sell to consumers at reduced prices.

**TWO YOUNG BRIDES DESERTED**  
DENVER, June 21.—Two pretty Denver brides, Mrs. Robert Graham, married six weeks ago, and Mrs. M. S. Courtland daughter of a Congressional minister in the East, who is wife of just this week, are now refusing the consolation of their friends over their short and inglorious matrimonial careers. They are the victims of two adventurers who have deserted them, taking all of their available valuables, which in the case of Mrs. Courtland are said to amount to \$500 in cash and diamonds valued at \$2500, while the money secured from Mrs. Graham are college-bred chaps, Courtland being a graduate of Ann Arbor University of Michigan, and they are said to have left a trail of broken hearts in their wake all over the West. Many shy and trustful maidens in San Francisco and Los Angeles had their fondest hopes blighted. It is said, by the sudden departure of the two triflers, whether or not they are blamable has not been established, but efforts were made today to find out if they had ever married in any of the Western cities where they had worked.

On this point Neale asked the witness concerning the conversation between himself and the defendant, bringing out the statement that Johnson had said: "If you start anything around here I will shoot you in the belly." The attorney had the witness repeat this sentence, and then said: "Are you sure that he said: 'If you start anything around here I will shoot you in the belly'?"

To which the witness answered that he was, and Neale evidently desiring to impress the conditional nature of the statement on the court, said: "You are just as positive concerning this portion of the conversation as you are of the other?" and the witness answered that he was.

Having secured these admissions Neale went on to question the witness concerning the time he worked in the district, and the various shafts at which he had worked.

Efforts which have been put forth by the Bisbee Board of Trade, covering a period of several months, during which time the Board has had the assistance of the traffic department of the El Paso & Southwestern in every instance, were brought to a close in Bisbee yesterday afternoon at a conference held in the office of Managing Director Walter Douglas, of the El Paso & Southwestern, in which Mr. Douglas, Mr. Brown, freight traffic manager, and a committee from the Bisbee Board of Trade, consisting of Messrs. Burton, Frank Harrington and J. P. Christian, participated.

The conference in Bisbee yesterday followed closely upon the return of Mr. Douglas from California, where he was accompanied by the traffic managers of the E. P. & S. W., and the question of securing reduced freight rates for Bisbee from California was gone over thoroughly with the Southern Pacific officials. The Southern Pacific officials were found willing to co-operate, and the reduced freight rates on certain commodities in carload lots, will be announced shortly by the traffic department of the El Paso & Southwestern.

President George Buxton, of the Bisbee Board of Trade, when seen last night by a Review man, said: "When the committee from the Board of Trade first undertook the matter of securing reduced freight rates on certain merchandise coming into Bisbee at present carload lots, we were assured by Mr. Douglas that he would do everything possible for Bisbee and Douglas, and stated that it was the policy of the El Paso & Southwestern to do everything in its power to build up the business industries everywhere along the line.

When informed by Mr. Douglas that in order to secure some reductions requested, that it would be necessary to secure the co-operation of the Southern Pacific from California points, and finally the conference between the E. P. & S. W. and S. P. was arranged to take place in Los Angeles, with the result that the agitation started by the Board of Trade, and assisted by the railroad officials, has been very successful.

"The greatest reductions were made on canned goods, groceries and provisions, and on almost every article shipped which takes the fifth class rate. On this class of goods the Board of Trade has assured a reduction of at least 20 per cent from California points and 15 per cent from eastern points will be made."

Mr. Buxton stated that the reductions conceded by the railroad company would mean a saving to the consumers in the district and in addition would enable the jobbing merchants to increase their trade with outlying towns, by cutting the saving to consumers in the cost of the necessities of life, on account of the reduced freight rates to Bisbee, would be not less than \$200,000 per annum.

In addition to the reduction in the fifth class rate, a reduction was made on furniture from the east in carload lots of 15 per cent.

## RECEIVED FREIGHT CO-OPERATION OF PEOPLE VERY NECESSARY

Board of Trade Successful in Obtaining From S. P. and E. P. & S. W. 20 Per Cent Reduction From California.

The presence of several cases of typhoid fever in the hospitals at the present time serves as a reminder of the fact that the residents of the district should take ordinary sensible measures to protect themselves against this disease, which, while scarcely ever fatal here, yet entails a great loss in wages and time.

At present there are eight cases of typhoid fever in the Copper Queen hospital, and one case in the Calumet and Arizona hospital, which fact shows that the disease has already made its appearance, and suggests that the time to use preventative measures has arrived.

Last fall at the invitation of Mayor Caven the physicians of the district met with the City Board of Health to discuss the subject of typhoid fever, and to suggest measures which would be likely to prevent an epidemic of the disease, or at least decrease the number of cases. At that meeting were present medical men who have treated thousands of cases of typhoid fever, and in their professional capacity have studied the disease, both as to its causes and effects. After a thorough discussion of the subject, participated in by all of the gentlemen present, a number of suggestions to the public were formulated, which the physicians had found from their experience to be most helpful in preventing the disease. These suggestions were printed in a pamphlet and it is the intention to mail them to every household in the district.

Chief among the suggestions of the physicians were that water from bad wells should not be used, and that food stuffs be protected from flies, which insects are known to carry the germs. On these two points great stress was laid. Another suggestion dealt with the proper disposal of sewage under the present primitive system in vogue. Besides these there were several other points, all of which are contained in the pamphlet, and will no doubt lead to a decrease in the number of cases of the disease.

At this meeting a table of statistics was read, which showed that although the mortality from typhoid fever was almost nothing, the loss in time and wages was enormous. It was estimated that more than \$500,000 were lost each year owing to the prevalence of the fever.

When seen yesterday a prominent physician said: "Now is the time for the people of the district to use every effort to avoid the disease, as this is the time of year in which it makes its appearance. I am fully convinced that the simple preventative measures suggested in the Board of Health's pamphlet will serve to greatly lessen the number of cases."

**NEW YORK FINANCIAL BUREAU.**  
(Special Wire to Duesy & Overlook.)

NEW YORK, June 21.—London was lower this morning on French troubles and New York manipulation.

Atchison down 5-8, Reading 3-8, Union Pacific 3-4, Erie 3-8, Southern Pacific 1, Steel 5-8, Amalgamated 5-8, and Anaconda 1.

Consols were only slightly lower.

It has been our experience that such a period of recuperative dullness has been usually succeeded by a tendency toward improvement, halting at first, but with the continued hammering of the market into compactness generally prevailing during these times, the stubborn shortage affords a leverage that can be worked upon by manipulation to a startling degree. It remains for the traders to judge the outcome as to the advisability of aggressive action. At present there is a passively optimistic attitude in important banking circles, we continue therefore to urge the maintenance of the trading position, with preference for the long side on recessions, but mainly traders should not neglect moderate profits or scalps while the professionalists dominate.
